

Fertilgold® 1-3mm

INSTRUCTIONS

- FERTILGOLD® 1-3mm should be applied when tissue and soil analysis identifies the need and proper rate of application for this product.
- Adds naturally occurring materials containing humic and fulvic acids to soil that may enhance plant micronutrient availability and uptake.
- Best results will be obtained when application is concentrated in the active root zone.
- Can be applied in combination with compatible plant growth regulators, pesticides, or other granular fertilizers except urea.
- Apply FERTILGOLD® 1-3mm by broadcast, using airplane or ground machines.
- Application timing, intervals, and rates may vary according to individual crop requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the crop.
- Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation.
- Consult your local FERTILGOLD® Representative or other agricultural specialist for crop-specific recommendations.

This product is intended as a supplement to a complete fertilizer program and will not, by itself, provide the nutrients normally required by agricultural crops.

STORAGE AND DISPOSAL

Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state, and/or federal regulations.

0-0-0

GUARANTEED ANALYSIS

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Total Humic Acid (HA) and

Fulvic Acid (FA) 60.0%-70.0%*

**Determined using Colorimetric Method*

Derived from: Oxidized Leonardite

Designed to be applied to the soil.

Avoid spreading during high humidity, or mixing with high moisture fertilizers such as urea.

Applications can be made as often as every 30 days as needed.

APPLICATION

METHOD	SUGGESTED RATE PER ACRE Field Crops / Tree or Vine Crops
Soil banded or side dressed	Up to 75 lbs / up to 150 lbs
Soil broadcast incorporated	Up to 150 lbs / up to 300 lbs

SAFETY

KEEP OUT OF REACH OF CHILDREN
