

PRILLED

INSTRUCTIONS

- FERTILGOLD® PRILLED should be applied when tissue and soil analysis identifies the need and proper rate of application for this product.
- Adds naturally occurring materials containing humic and fulvic acids to soil that may enhance plant micronutrient availability and uptake.
- Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil followed by a shallow cultivation..
- Can be applied alone or in combination with other granular fertilizers.
- Apply FERTILGOLD® PRILLED by broadcast, using airplane or ground machines.
- Application timing, intervals, and rates may vary according to individual crop requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the crop.
- Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation.
- Consult your local FERTILGOLD® Representative or other agricultural specialist for crop-specific recommendations.

This product is intended as a supplement to a complete fertilizer program and will not, by itself, provide the nutrients normally required by agricultural crops.

STORAGE AND DISPOSAL

Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state, and/or federal regulations.

GUARANTEED ANALYSIS

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

Total Humic Acid (HA) and
Fulvic Acid (FA) 60.0%-70.0%
(Determined using Colorimetric Test Method)

Other Test Methods:

Total Humic Acids (HA) 35.0%-40.0%
(Analysis using the HPTA or ISO 19822 Test Method)

Total Humic Acids (HA) 30.0%-35.0%
(Analysis using the CDFA Test Method)

Derived from: Oxidized Leonardite

SOIL AMENDMENT

Applications can be made as often as
every 30 days as needed.

APPLICATION

METHOD	SUGGESTED RATE	
	Field Crops	Tree or Vine Crops
Soil banded or side dressed	Up to 75 lb/acre, 75 kg/hectare	Up to 150 lb/acre, 150 kg/hectare
Soil broadcast incorporated	Up to 150 lb/acre, 150 kg/hectare	Up to 300 lb/acre, 300 kg/hectare
