

LIQUID HA 15

INSTRUCTIONS

- FERTILGOLD® LIQUID HA 15 should be applied when tissue and soil analysis identifies the need and proper rate of application for this product.
- Adds naturally occurring materials containing humic acids to soil that may enhance plant micronutrient availability and uptake.
- Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil followed by a shallow cultivation.
- Can be applied alone or with liquid fertilizers with a pH of 7.0 or higher. If compatibility is in question, jar test a small quantity.
- FERTILGOLD® LIQUID HA 15 can be applied to all crops including fruits, vegetables, trees, vines, flowers, ornamentals, turf, grains, and other row crops.
- Avoid spreading on live crops, during high temperatures, or in times of drought.
- Application timing, intervals, and rates may vary according to individual crop requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the crop.
- Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation.
- Consult your local FERTILGOLD® Representative or other agricultural specialist for crop-specific recommendations.

This product is intended as a supplement to a complete fertilizer program and will not, by itself, provide the nutrients normally required by agricultural crops.

STORAGE AND DISPOSAL

Keep product in original container. Do not transfer into food or drink containers. Triple rinse when empty for recycling. Always dispose of container in accordance with local, state, and/or federal regulations. Do not store this product below 50°F (10°C) or above 90°F (30°C).

GUARANTEED ANALYSIS

Soluble Potash (K₂O) 3.5%
Derived from: Potassium Hydroxide

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

**Total Humic Acid (HA) and
Fulvic Acid (FA) 15.0%**
(Determined using Colorimetric Test Method)
Derived from: Oxidized Leonardite

Other Test Method:
Total Humic Acids (HA) 11.0%
(Analysis using the CDFA Test Method)

SHAKE WELL BEFORE USE.

**Applications can be made as often as
every 15 to 30 days as needed.**

APPLICATION

| METHOD | SUGGESTED RATE | |
|---|--|--|
| | Field Crops | Tree or Vine Crops |
| Soil banded, injected, side dress, drip tape, or micro sprinklers | up to 1 gallon/ac up to 10 liters/ha | up to 2 gallons/ac up to 20 liters/ha |
| Sprinklers: solid set, drag lines, linear, or pivot @ 100% speed | up to 2 gallons/ac up to 20 liters/ha | up to 4 gallons/ac up to 40 liters/ha |
| Soil broadcast spray incorporated, flood or furrow irrigated | up to 4 gallons/ac up to 40 liters/ha | up to 8 gallons/ac up to 80 liters/ha |

pH: 9.0 - 10.0

9.09 lb/gal @ 68°F
1.09 kg/L @ 20°C
